Visibly CHANGING TOMORROW

At Astellas we know there’s more to treating skin conditions than meets the eye. That’s why we’re committed to working with patients and physicians to provide innovative solutions and support to those affected by these disorders. Our unique portfolio provides a comprehensive range of therapies for the treatment of different skin conditions, and is constantly being reviewed and refined to reflect the latest scientific knowledge and the changing needs of patients and physicians. Because we see things differently, we can use our expertise to identify and develop new ways to change the lives of patients with skin conditions. Our goal is clear—to give physicians and patients confidence in a better tomorrow.

Invitation

Dear colleagues,

Following the great success of the first Munich International Summer Academy, held in July 2007 with more than 700 participating dermatologists from 38 countries around the world, the organizers from the Department of Dermatology of the Ludwig-Maximilian University of Munich are now enthusiastically preparing for the second meeting.

In order to provide continuing and enriching medical education in practical dermatology, a one-week course will be offered from July 24-29, 2011. The curriculum will both review the broad spectrum of clinical dermatology and introduce the latest scientific advances just starting to impact on our field. Each morning plenary sessions will allow the audience to benefit from the expertise of internationally prominent lecturers dealing with main topics in general dermatology. In the afternoon several symposia, parallel hands-on courses and workshops will put major emphasis on the acquisition of practical knowledge and in-depth skills in important sub-specialty areas such as surgical and aesthetic dermatology, laser and photodynamic therapy, phlebology, dermatohistopathology, and others.

Participants will have the opportunity to meet colleagues from around the world, discuss the newest pharmaceutical developments at the industrial exposition and make new professional and personal friendships that may continue until the next ISA meeting in 2013.

Although an intensive educational experience is the driving force of the ISA 2011, the social and cultural part of a visit to Munich should not be missed. Munich as a cosmopolitan city and capital of Bavaria features a rich cultural life including important collections of classical, modern and contemporary art. In July the famous Munich Opera Festival, shopping at the prestigious Maximilian Street or just having a refreshing beer at one of the many beer gardens. An evening in a historical Bavarian beer hall will immerse you in typical Bavarian traditions, and a boat trip on Lake Starnberg will provide you with an impression of the beautiful Bavarian countryside and nearby Alps.

A number of travel stipends will be available for residents and young physicians from emerging countries.

We cordially invite you to join this Second Munich International Summer Academy of Practical Dermatology, which will be held in a central location of Munich during one of the loveliest seasons in our charming city.

Thomas Ruzicka

Plenary Lectures:
Acne and Rosacea
Allergology
Atopic Eczema
Auto-Inflammatory Syndromes
Environmental Dermatology
Genetics in Dermatology
Infectious Skin Diseases
Inflammatory Skin Diseases
Itch
Hydroa vacciniforme
